Individual solutions

ACCESS TO THE ELECTRICITY MARKET

Urbener is a Market Agent and, as such, acts as a **Direct Consumer** Representative on the Iberian electricity market.

First company to offer **INDIRECT** representation of consumed aggregation

DIRECT

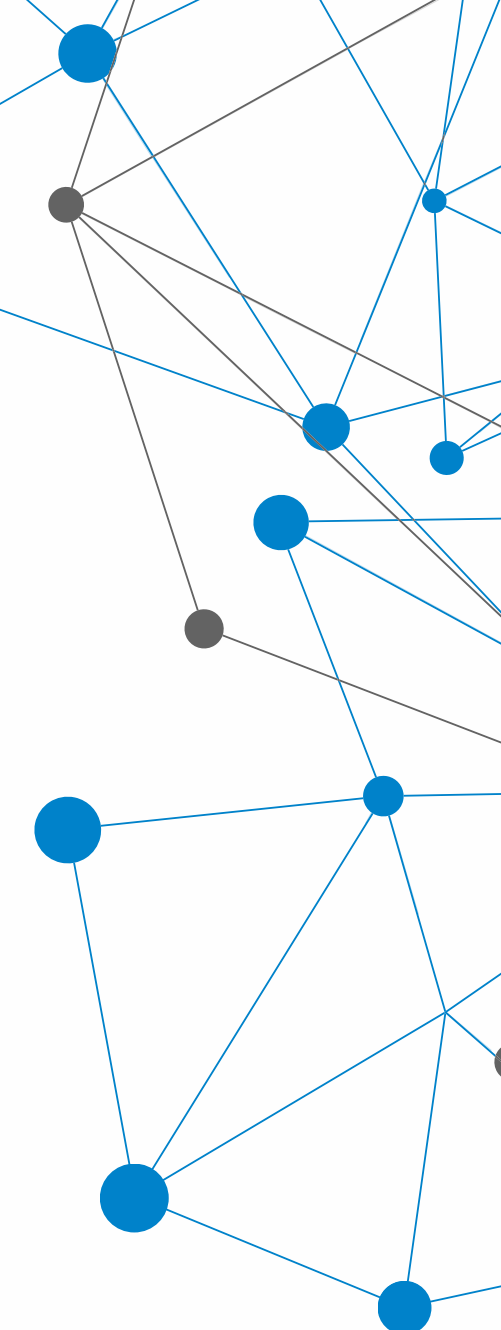

Representation for and on behalf of others

The Participant acts as a settlement agent, is responsible for payments, guarantees and deviations. It delegates the operational part to a Representative such as URBENER.

INDIRECT

Representation in own name and for others

The Representative is the subject of settlement, is obliged to pay and deposit collateral. Clients benefit from the netting of deviations from the representative's portfolio.

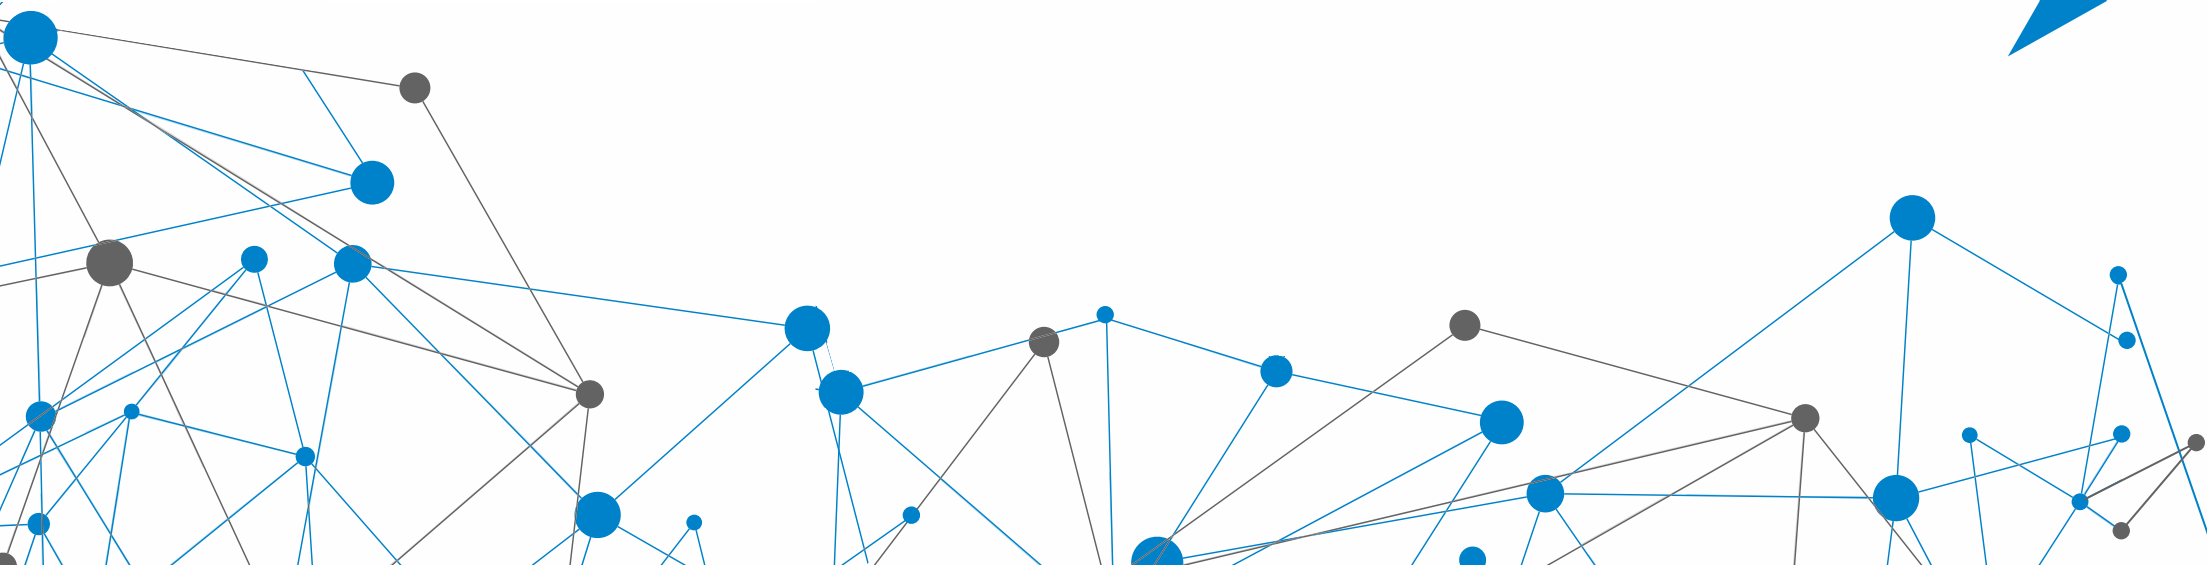

MARKET PARTICIPANT – BENEFITS

Differential strategies

- **Trading in the different markets.**
Daily, intraday and futures.
- **Physical Bilateral Contracts (PBC).**
- **Payment for the electricity consumed.**
Unlike indexed contracts, there are no marketing costs.
- **Efficiency Fund payment exemption.**
0.947453 €/MW
- **Exemption from payment of Municipal Tax.**
1.5% on the base
- **Certificate of Guarantees of Origin (GOs).**
- **Balance Services.**

MARKET OPPORTUNITIES – PBC

PBC

Energy purchase and sale agreement between a qualified consumer (Direct Consumer) and a producer.

A quantity of energy is committed at a time agreed between the parties.

PRICE

Fixed or variable. Open to negotiation during the term of the contract.

TIME

Fixed term with different extensions, as agreed by the parties.

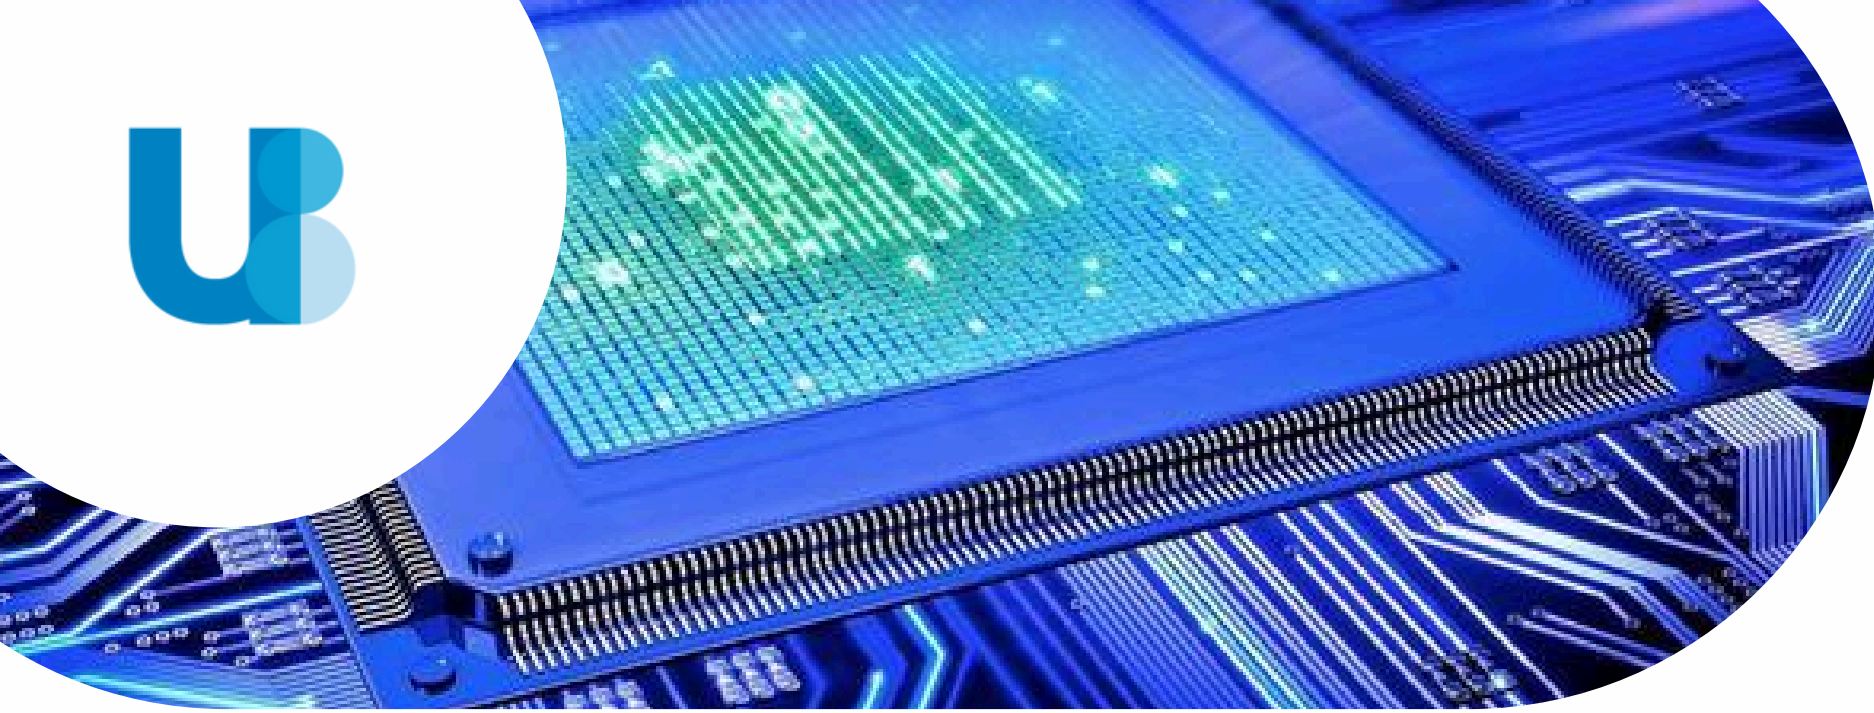

VOLUME

The energy to be delivered/withdrawn and the minimum power to be supplied/consumed by each of the parties.

GUARANTEES

Agreeing on the guarantees to be provided by both parties to ensure the solvency of the contract

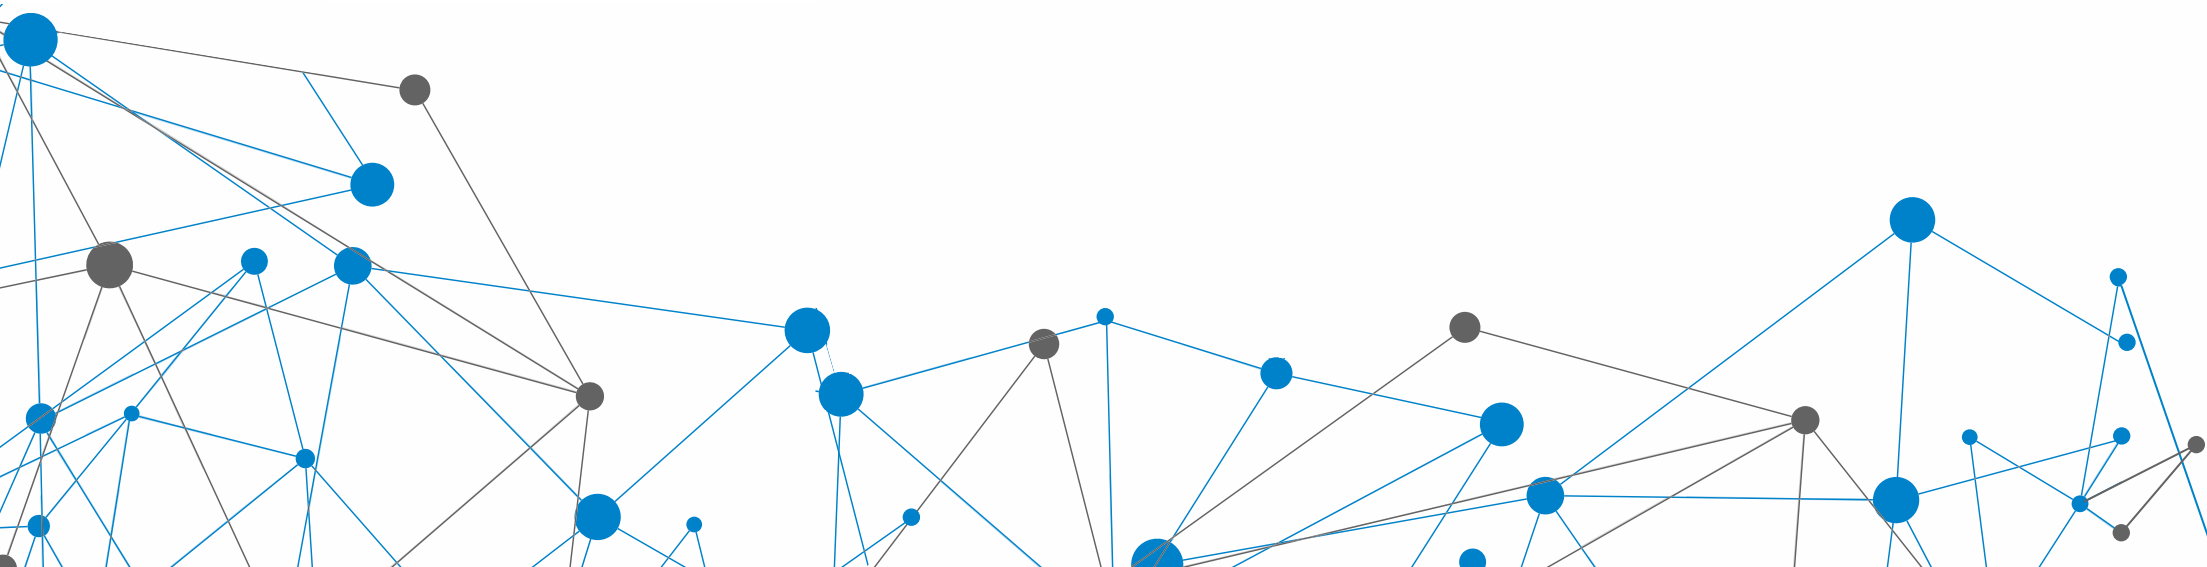

ENERGY MANAGER

Single platform for energy requirements

- Market integration
- Real time management
- Consumption aggregation
- Consumption accuracy
- Demand response
- Smart meters
- GIS engine
- Alerts
